

HAVE A CUSTOM APPLICATION? Get a Custom Solution!

As a precision manufacturer of high-quality, round, half-round, square, hex, flat, bunched and custom-shaped wire, **AMETEK** Specialty Metal Products offers a wide range of alloy and pure-metal combinations, including aluminum, copper, nickel and stainless steel.

By using a variety of forming technologies, such as drawing, rolling and shaping, **AMETEK** gives you the tight tolerances you need for fabricating simple or complex shapes that meet your exacting specifications.

Some of the many applications for **AMETEK SHAPED WIRE** are:

- Electronics
- Rivets
- Dental
- Jewelry
- Lighting
- and More...

Our superior technical expertise gives **AMETEK SHAPED WIRE** the purity, consistency and close compositional control you need for improved die wear, formability and platability.

The next time your custom application needs an innovative solution, call **Ryan Smith** at **203/949-8839**, e-mail ryan.smith@ametek.com or visit www.ametekmetals.com
